

Hago de Cuba August 30 1840

Mr March Wright
My Dear Aunt

I was duly in receipt of your much esteemed letter of 9th of June and had much pleasure in it & perusal, and pleased I feel that the tokens forwarded as we received by you in the same spirit I intended it. I observe your continued walk attending year of meetings and should not at all wonder if the effects were all you imagine a free entree of Rheumatism. This now some time since I have had a line from Ohio that from last week Father was getting over the attack of illness and I take it for granted that he has fully recovered & otherwise they would most assuredly have again written me, is it not strange that I who have much to do should write more than any of them, and particular of as Uncle William we will be ought not to permit anxiety to prevail for lack of a few lines. Remember me to all friends & and relations and say to some that mine was the last letter. This satisfactory indeed to read your description of the good effects of Doctolalim. I sincerely hope that it may continue to increase for I truly believe that Spirits & Wife have been the cause of more evil to Europe than all the War that it has undergone. Please to direct to me to this Post as the Mail are now delivered here as follows.

James Wright
Hago de Cuba

I shall forward the Dir Case of Putter fl. & Co
by first opportunity to sail in a few days to the care of Captain
John Rayton off Swansea to be held by him subject to your
order, and I hope you will be able without any inconvenience
to have it forwarded to you from thence you will be pleased
to address him on the subject and he will attend to your commu-
nications thereupon. I am almost constantly employed
at business and have little time but Sunday and Holy days of
which latter we have many in this Country to devote to my private
rate and social correspondence. How much happiness
I shall enjoy to be able to execute my plan of visiting
the land of my Nativity next year. I have forgotten much
of years past but still yearn toward even the inanimate
things of my natal soil.

My health maintains itself pretty
well but I am particular in diet, seldom eat any meat,
and drink no wine or spirits to which and I generally
eat alone, very seldom indeed dining out.

I have no reason to complain of
want of success in business, since I last returned now
about 2 years since, the use has done a large and
profitable one.

Adieu Dear Aunt
Yr affectionate Nephew
James Wright
